1. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Nanaji, Saisuu, Komukai et al., and Akiba et al., teach other fuel sensing and discriminating systems but do not disclose the sensor to be used to control a valve that opens and closes a vent tube as claimed.

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee. Note that on lines 9 and 10 of claim 12, there is no antecedent basis for "said" vent tube because there is no previous mention of any vent tube in claim 12. Consequently "said" on line 9 of claim 12 is being changed to – a – to make the claim contextually correct. Also note that all continuing applications must reference the parent application.

3.

The application has been amended as follows:

In claim 12,

Line 9: "said" (second occurrence) has been changed to – a --.

In the specification,

Page 1, line 1 (between title and the heading "Background of the Invention") the following new paragraph has been inserted –

This application is a divisional application of U.S. application no. 10/140,686 filed May 7, 2002, now U.S. patent no. 6,712,102. --.
